

Session 7 Quiz — Azure Identity, Access, and Security

Name: _____ Session: _____

Time: 10 minutes · **Items:** 10 · **Target:** 80%

Answer every question. For *select all that apply*, mark every correct option. For matching questions, write the matching term next to each numeral. For yes/no sets, write yes or no next to each numeral. Your instructor reviews every answer in class immediately afterward.

1. An organization has applications that require traditional domain features — domain join, group policy, LDAP, and Kerberos or NTLM authentication — but does not want to deploy and maintain domain controllers in Azure. Which service fits?

- A. Microsoft Entra ID
- B. Microsoft Entra Domain Services
- C. Microsoft Entra Connect
- D. Microsoft Defender for Cloud

2. Which three passwordless authentication options does Microsoft Entra ID support?

- A. SMS codes, security questions, and email links
- B. Windows Hello for Business, the Microsoft Authenticator app, and FIDO2 security keys
- C. Smart cards, RADIUS tokens, and one-time passwords
- D. Password managers, biometrics, and CAPTCHA

3. A supplier's staff need access to one internal application using their own work identities, and they should appear in your directory as guests. Which capability is this?

- A. B2B collaboration
- B. B2B direct connect
- C. Microsoft Entra External ID for customers
- D. Microsoft Entra Domain Services

4. During sign-in, Conditional Access performs which sequence?

- A. Encrypt, transmit, decrypt
- B. Collect signals, make a decision, enforce the decision
- C. Authenticate, authorize, audit
- D. Assess, secure, defend

5. You assign the Reader role to a group at subscription scope. What can members of that group do?

- A. Read every resource group and resource in that subscription
- B. Read only the resources created after the assignment
- C. Read and modify resources in the subscription

- D. Nothing until the role is also assigned at each resource group

6. Which statement about Azure RBAC is correct?

- A. RBAC uses a deny model, so the most restrictive assignment wins
- B. RBAC uses an allow model, so permissions from multiple assignments combine
- C. RBAC enforces permissions inside applications and at the data level
- D. RBAC assignments do not inherit to child scopes

7. Which three principles guide the Zero Trust model?

- A. Trust but verify, defend the perimeter, encrypt everything
- B. Verify explicitly, use least privilege access, assume breach
- C. Authenticate, authorize, account
- D. Detect, respond, recover

8. In the defense-in-depth model, which layer uses DDoS protection to filter large-scale attacks before they cause a denial of service for users?

- A. The network layer
- B. The perimeter layer
- C. The compute layer
- D. The identity and access layer

9. A security team wants a single place to see a score representing their security posture, receive prioritized hardening recommendations aligned to a security benchmark, and get alerts on detected threats — covering Azure, on-premises servers, and workloads in AWS. Which service provides this?

- A. Azure Monitor
- B. Microsoft Defender for Cloud
- C. Azure Policy
- D. Microsoft Entra Conditional Access

10. For a platform-as-a-service database, which responsibilities remain with the customer?

- A. Patching the database engine and the underlying operating system
- B. The data stored in the database, and the identities and access granted to it
- C. The physical hosts and physical network
- D. Nothing; PaaS transfers all responsibility to the provider

Answer sheet

#	Your answer	#	Your answer
1		6	
2		7	
3		8	
4		9	
5		10	

Score: ____ / 10

Objectives to review: _____
