

Session 8 Quiz — Azure Cost Management

Name: _____ Session: _____

Time: 15 minutes · **Items:** 12 · **Target:** 80%

Answer every question. For *select all that apply*, mark every correct option. For matching questions, write the matching term next to each numeral. For yes/no sets, write yes or no next to each numeral. Your instructor reviews every answer in class immediately afterward.

1. Which of these affect what an Azure resource costs? (Select all that apply.)

- A. The resource type and the settings chosen for it
- B. The region where the resource is deployed
- C. The number of tags applied to the resource
- D. The subscription type, which may include usage allowances
- E. Third-party charges for solutions purchased through Azure Marketplace

2. A team provisions a virtual machine, then deletes the VM but leaves its disks, network interface, and public IP address in place. What is the cost consequence?

- A. None; dependent resources are always deleted with the VM
- B. The leftover resources continue to incur charges until they are removed
- C. The resources are billed at half rate while unattached
- D. Azure automatically deletes unattached resources after 24 hours

3. Moving data out of an Azure datacenter is priced using which concept?

- A. Availability zones
- B. Billing zones, which are geographical groupings of regions used for data-transfer pricing
- C. Region pairs
- D. Management groups

4. Which statement about the Azure pricing calculator is correct?

- A. Adding resources to the calculator provisions them in your subscription
- B. It produces an estimate only, and nothing is provisioned or charged
- C. It reports your actual spend for the current billing cycle
- D. It replaced Microsoft Cost Management

5. A team wants to compare the monthly estimated cost of the same three-tier design in two different regions before deploying anything. Which tool should they use?

- A. Microsoft Cost Management cost analysis
- B. The Azure pricing calculator
- C. Azure Advisor
- D. Azure Monitor

6. Which feature of Microsoft Cost Management lets you view accumulated costs broken down by subscription, resource group, or service to find where spend is accruing?

- A. Cost analysis
- B. Budget alerts
- C. Resource locks
- D. Azure Policy compliance state

7. Which statements about budgets and cost alerts are correct? (Select all that apply.)

- A. A budget can be scoped to a subscription, resource group, or service type
- B. Setting a budget automatically stops all spending when the limit is reached
- C. Budget alerts notify recipients when spending crosses a threshold you define
- D. Budgets can trigger automation that suspends or modifies resources at a threshold
- E. Credit alerts and department spending quota alerts are both types of cost alert

8. Which statement about resource tags is correct?

- A. Resources inherit tags from their resource group and subscription automatically
- B. Tags are name and value pairs that are not inherited, and Azure Policy can enforce required tags
- C. Tags can only be applied through the Azure portal
- D. Every resource must carry the same set of tags

9. An organization wants monthly cost reports broken down by internal cost center and by environment. What is the prerequisite?

- A. A separate subscription per cost center
- B. A consistent tagging strategy applied to the resources
- C. A resource lock on each resource group
- D. Read access to the pricing calculator

10. A workload runs a predictable, constant compute load and the team can commit financially for three years, but wants flexibility in which VM series it uses over that period. Which option fits best?

- A. A reservation for a specific VM size
- B. Azure savings plan for compute
- C. Azure Spot Virtual Machines
- D. Pay-as-you-go

11. Storage costs need to come down for a dataset that is accessed a few times a year but must remain immediately readable. Which change is most appropriate?

- A. Move the data to the archive tier
- B. Move the data to the cool or cold tier
- C. Change redundancy from GZRS to LRS and keep the hot tier
- D. Delete the data and re-upload when needed

12. A finance analyst must review cost data for a subscription but must not be able to change any resources. Which approach follows least privilege?

- A. Assign Owner at the subscription scope
- B. Assign Contributor at the subscription scope
- C. Assign a read-level role at the subscription scope
- D. Apply a ReadOnly resource lock to every resource group

Answer sheet

#	Your answer	#	Your answer
1		7	
2		8	
3		9	
4		10	
5		11	
6		12	

Score: ____ / 12

Objectives to review: _____
